EXORDIUM

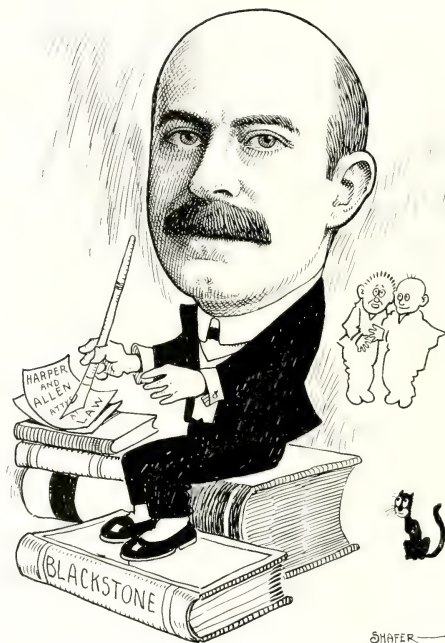

THE only possible excuse offered by the compilers of this "pantheon of portraits" is that the subjects portrayed have become, at least locally, conspicuous, and, as the pencil of the cartoonist "loves a shining mark," the victims of this gallery are earnestly entreated to bear with becoming fortitude the penalty of their prominence.

In point of number, the representations herein contained have gone far beyond the original limitations, and places upon us the happy obligation of acknowledging our sincere thanks for the kindly interest and substantial support extended by our patrons.
